PRODUCT OVERVIEW

Deckro provides the ideal solution for Top of Rack applications with its Top of Rack Patching module. It is suitable for Data Center and Equipment Room solutions. This product range has 4U, 6U and 8U versions and can be mounted either on to Basket Trays or Ladder Trays.

It can also be mounted directly onto above a false ceiling to provide a consolidation point within commercial office installations.

It is easy to assemble since product comes with four basic parts and can be installed within minutes.

Powder painted in Grey (RAL7035) or Black (RAL9005).
